Disclaimer - Be careful when hanging valuable objects
This STAS hanging system is designed for safe and flexible wall hanging of art and decorative objects. Use the system only according to the instructions provided, and observe the maximum load per hook and per meter of rail. If you use the system to hang objects with a special or high (emotional or financial) value – such as works of art, paintings or heirlooms – we recommend professional installation and consultation with a specialist. STAS is not liable for damage to such objects as a result of incorrect installation, unsuitable surfaces or overloading the system.
