STAS picture hanging systems

What makes a room comfortable?
You'd be surprised how much influence the items hanging on walls and from the ceiling have on the feeling of comfort of a room. Wall decorations, advertisements, wayfinding signs… all of these affect people's behaviour. At STAS, we provide flexible picture hanging systems and accessories that are aimed to improve rooms. And we believe that these solutions should serve the purpose of the room itself.

We make sure to provide a total solution for your room, so that…
… kids in the classroom can focus without any distractions from a cluttered classroom wall
… art lovers can enjoy an art collection that hangs neatly and secured
… restaurant patrons opt for a cup of coffee after dessert
… meetings in the office become more efficient
… residents of nursing homes get inspired and relive beautiful memories
… and you can change your home interior whenever you want, to your taste

With STAS you'll never have to drill unnecessary holes in your walls again and you can change or move your wall decor whenever you want. From light to dark and from functional to decorative.

So … how are you going to change your interior?

STAS. Transform your room.

STAS minirail

sleek and strong

STAS minirail is characterised by its extremely slim, narrow design and innovative mounting method.

The rail itself is just 16 mm in height, yet it can carry up to 25 kg per linear metre. Thanks to an innovative screw, the STAS clipscrew, the rail can easily be fixed to the wall.

STAS minirail is perfect for creating an elegant, unobtrusive hanging system for light to mediumweight objects.

- dimensions 9 x 16 mm
- length 150, 200 or 300 cm
- aluminium
- white, alu or black
- wall mountable, not adjoining to ceiling
- weight capacity 25 kg/m
- 5 years warranty

STAS cliprail

the perfect basis

STAS cliprail is a high-quality picture hanging system without bells and wistles. It is easy to install and feels right at home in every interior.

The cliprail owes its name to the specially designed fastening clip - the STAS railclip - which allows easy fixation to the wall.

- dimensions 8.2 x 25 mm
- length 150, 200 or 300 cm
- aluminium
- white, alu or black
- wall mountable, not adjoining to ceiling

STAS cliprail max

perfect gap-free ceiling connection

STAS cliprail max is a hanging system for the perfectionist. An extra rim ensures the rail connects beautifully with the ceiling. With this system, your ceiling, wall and picture hanging system unite as one.

The rail is most attractive when fixed to flat ceilings.

STAS cliprail max owes its name to the specially designed fastening clip - the STAS railclip - which allows easy fixation to the wall.

For the best result, you can neatly finish the transition between the STAS cliprail max and the ceiling by adding an (acrylic) sealant.

- dimensions 8,3 x 31,6 mm
- length 150, 200 or 300 cm
- aluminium
- white, alu or black
- wall mountable, adjoining to ceiling

STAS cliprail pro

elegant powerhouse

STAS cliprail pro is ideal for hanging heavier objects on walls thanks to its thick-walled profile. This rail can carry an amazing 45 kg per linear metre.

Despite its large weight-bearing capacity, the STAS cliprail pro is an elegant, unobtrusive rail that can be used in professional environments as well as in the home.

STAS cliprail pro owes its name to the specially designed fastening clip - the STAS railclip - which allows easy fixation to the wall.

- dimensions 11,3 x 28 mm
- length 150, 200 or 300 cm
- aluminium
- white, alu or black

PATENT PENDING

STAS plasterrail

for the forward thinker

STAS has renewed the design of the STAS plasterrail! The STAS plasterrail is now even better in quality with its renewed design. You attach the aluminium rail to a bare wall with nails and after the rail and the rest of the wall have been plastered, a very narrow opening remains visible in the stucco. As a result, this picture hanging system can be fully integrated into a new wall to be plastered and is therefore virtually invisible.

The renewed design ensures flawless installation, requires only a thin plaster layer of +/- 6 mm and the supplied safety strip ensures that the picture hanging system remains free of stucco. An ideal picture hanging system for renovations and new construction projects!

- dimensions 6,4 x 40 mm
- length 200 cm
- aluminium
- layer thickness stucco 6 mm
- wall mountable, to be integrated into stucco
- weight capacity 15 kg/m
- 5 years warranty

including safety strip

For matching hooks and cords, see page 35.

STAS j-rail

professional versatility

The design of STAS j-rail was based on the shape of the letter J. This shape allows the rail to be combined in all kinds of different ways using hooks, cords and even rods.

For example, by using a rod instead of a cord or steel cable, moving or alternating works of art on high ceilings becomes a piece of cake. You won't need a ladder, because the rod can be lifted out of the rail from below.

STAS j-rail has a somewhat industrial look and is applied regularly in art galleries and in business premises.

- dimensions 7 x 20 mm
- length 150, 200 or 300 cm
- aluminium
- white or alu
- wall mountable, not adjoining to ceiling
- weight capacity 25 kg/m
- 5 years warranty

STAS j-rail max

heavyweight champion

STAS j-rail max is designed for the heavy objects. The thick-walled aluminium profile is capable of supporting loads of up to 100 kg per linear metre.

What's more, STAS j-rail max is combined with rods instead of cords, which makes alternating and moving heavy works of art on high ceilings a piece of cake. You won't need a ladder, because the rod can be lifted out of the rail from below.

The STAS j-rail max system is also available with theft-delaying security hooks and is often used in art galleries and museums.

- dimensions 9 x 21 mm

STAS u-rail

suspended ceiling becomes hanging system

STAS u-rail is specially designed for suspended ceilings. The rail is easily and almost invisibly attached to the supporting edge trim of the suspended ceiling.

STAS u-rail is also ideally suited for hanging whiteboards, art or large maps. So now, with just a small modification, your suspended ceiling becomes a versatile picture hanging system, ideal for use in offices, schools and healthcare facilities.

- dimensions 14 x 6,5 mm

STAS windsor & riva

bring a piece of nature into your home

In addition to aluminum rails, STAS also offers wooden rails in 2 different models. The STAS windsor is elegant and warm where the STAS riva has a more robust look and feel. Two distinctive models, suitable for any interior! Both models are easy to use and each has a different profile for which fitting hooks are available.

Our wooden rails are made out of Ayous wood and are FSC and PEFC certificated. Ayous wood differs from other wood since it does not deform or splinter, and is perfectly suitable to repaint because of its smooth texture. Perfect wood for your picture hanging system! Can be mounted screwed, nailed and glued*.

* The weight capacity of a glued rails is highly dependent on the surface, so care must be taken here. More information on how to best glue our wooden rails can be found on our website www.stasgroup.com

STAS evoluon

bends along with you

From now on, curved walls can also be used optimally with the STAS evoluon! The STAS evoluon has been specially developed for curved walls, but this rail is just as easy to mount on straight walls or (slightly) undulating walls.

The rail is bendable and can be bent perfectly proportional along the contours of a wall by means of a supplied auxiliary tool. In this way, the STAS evoluon provides hanging possibilities for difficult places and walls otherwise unusable for picture rails.

STAS drywallXpress

PATENT PENDING

no stress with the drywallXpress

With the STAS drywallXpress you can mount a picture hanging system on a plaster wall in no time. No need to pick up that drill because you don't have to drill to assemble this system.

The STAS drywallXpress is a complete picture hanging system that consists of clips, STAS cliprail and an auxiliary tool. With the help of the enclosed tool and a hit with a hammer you can easily push the metal clips into your plaster wall. Click the rail onto the clips and combine this picture hanging system with the STAS cords with cobra.

STAS drywallXpress: the easiest picture hanging system in the world!

STAS plasterboard rail

integrated ceiling rail

The STAS plasterboard rail is a built-in picture hanging system for rooms to be built or renovated with plaster, timber or concrete walls and plasterboard ceilings. The picture hanging system together with the wooden framework, is mounted under the beam layer on the wall.

Thanks to the 2 different profiles (9.5 mm / 12.5 mm), plasterboards with a thickness of 9 mm or 12 mm can be slid into the profiles of the STAS plasterboard rail. The result is a tightly finished room with an almost invisible picture hanging system that disappears into the shadow line of the plasterboards.

The STAS plasterboard rail can be used with the STAS cords with cobra.

- dimensions 9,5 mm rail 31 x 36 mm
  dimensions 12,5 mm rail: 34 x 36 mm
- length 200 or 300 cm

STAS drop ceiling rail

all-in solution for drop ceilings

The STAS drop ceiling rail is an all-in solution for rooms with a drop ceiling. The STAS drop ceiling rail replaces the wooden ceiling tile support strips and the corner profile for installing drop ceilings, and is equipped with a picture hanging system as well.

Thanks to the innovative profile of the STAS drop ceiling rail, the picture hanging system can be mounted directly on the wall. Corner profile and picture hanging system become one. The suspended ceiling plates can be placed in the profile of the STAS drop ceiling rail. The result is an almost invisible picture hanging system that disappears in the shadow line of the drop ceiling.

The STAS drop ceiling rail can be used with the STAS cords with cobra.

- dimensions 31 x 35 mm
- length 200 or 300 cm

STAS multirail

hanging and lighting rolled into one

A STAS multirail system is a picture hanging system and artwork lighting rolled into one.

Inside the rail, 12 V wiring (low voltage) has been integrated. Various matching light fixtures can then be clicked into the rail at any position you choose, accentuating your wall decorations. In combination with LED lighting, the STAS multirail is very energy efficient.

For matching hooks and cords, see page 32. For matching accessories, see page 27.

STAS multirail max

perfect gap-free ceiling connection

A STAS multirail system is a picture hanging system and artwork lighting rolled into one. Inside the rail, 12 V wiring (low voltage) has been integrated. Various matching light fixtures can then be clicked into the rail at any position you choose, to accentuate your wall decorations.

The STAS multirail max distinguishes itself thanks to the extra rim that ensures a tight fit against flat ceiling surfaces. With this system, your ceiling, wall and picture hanging system unite as one. Cables can be hidden behind the rim.

For the best result, you can neatly finish the transition between the STAS multirail max and the ceiling by applying an (acrylic) sealant.

- dimensions 11,3 x 38,3 mm
- length 200 or 300 cm
- aluminium
- white or alu
- wall mountable, adjoining to ceiling
- weight capacity 45 kg/m
- 12 V (low voltage)
- adapter 18W, 36W, 84W
- 5 years warranty on rails, 1 year on accessories

STAS Wi-Fi smart LED

The STAS Wi-Fi smart LED is a smart LED lamp that can be used with a specific range of STAS fixtures. You don't have to be a technician to install this smart LED lamp, a good Wi-fi signal is simply enough. With the accompanying free app and connected to your Wi-Fi network, you can easily switch the STAS Wi-Fi smart LED lamps on and off. It is even possible to illuminate each painting individually with the desired light color and light intensity (2700K warm light > 6500K daylight). From a crisp light in the morning to a warm and cozy light in the evening. With the STAS Wi-Fi smart LED, the colors in your wall decoration come into their own even more beautifully.

The STAS Wi-Fi smart LED lamps are 100% continuously dimmable and that without the intervention of an external Hub. It is also possible to create groups for certain rooms and the lamps have a timer setting so that your lighting can be switched on and off automatically. As icing on the cake, the STAS Wi-Fi smart LED also supports voice control in combination with Amazon Alexa, Siri and Google Home.

STAS fixtures for STAS Wi-Fi smart LED

These 3 different fixtures have been specially developed for the STAS Wi-Fi smart LED and the STAS multirail systems. The STAS Wi-Fi smart LED lamp can be easily mounted on a fixture with the supplied Allen key. You can easily click a fixture on a desired spot in the STAS multirail. The Classic fixture can only be adjusted in height and the lamp base can be turned. The Sirius fixture has a flexible part that allows you to make small adjustments in the direction of the light beam.

STAS Wi-Fi smart plug

You really don't have to be a technical miracle to remotely control or automate your connected equipment. All you need is our smart plug called the STAS Wi-Fi smart plug and your Wi-Fi router. Connected to the STAS Wi-Fi smart plug, you can remotely operate the STAS multirail or other electronic devices. With the free app and connected to your Wi-Fi network, you can easily switch the STAS multirail on and off. This way you are always in control of lighting the art on your wall.

The STAS Wi-Fi smart plug has a handy timer function so that the STAS multirail switches on automatically when, for example, you come home from work or when you are on holiday. In addition, the STAS Wi-Fi smart plug also supports voice support in combination with Amazon Alexa or Google Home.

Lifespan	40.000
Energy class	A+

Fixtures

STAS offers a choice of 3 different light fixtures in various lengths. Your choice depends on your personal preference and on the size of the artwork you wish to illuminate. Every light fixture fits on all multirail systems.

Tips
The bigger the distance between light source and wall, the bigger the artwork that can be illuminated. In other words: choose a large fixture for lighting a large work of art.

Adjusting
All fixtures have a flexible or hinged part with which small adjustments to the beam angle can be made.

1 year warranty applies to all multirail accessories.

Adapters

The choice of an adapter depends on 3 things:

1. the type of spotlight you'd like to use
2. the number of spotlights you'd like to install

View the tables below for the best choice.

VT20036	Adapter 36 W	8	7	6
VT20084	Adapter 84 W	20	17	14
Maximum number of meters of rail per adapter		16	16	16

Using multiple adapters

In case you would like to use more than the below mentioned number of metres or spots, you will have to use multiple adapters.

CAUTION:

Create independent circuits when using more than one adapter! Adapters must never be connected, neither directly nor indirectly. In short: NEVER connect two rail segments that are each connected to a different adapter! Exclusively connect rail segments that share one adapter.

Dimming of light

The current STAS adapters are not yet dimmable. We strongly advise against connecting your own switch or dimmer to the system. Be aware that if you do this anyway, all system warranty expires. Use the STAS Wi-Fi smart-led and matching fixtures if you'd like to have dimmable picture lighting.

Magnetic hanging solutions

STAS magnet sets 40

STAS magnet sets

cards on a cable

A STAS magnet set consists of a steel cable with cobra and five or ten magnets. Hook the steel cable into your STAS rail. Using the magnets, you can then hang photos, cards and memos on the cable. It's ideal for Christmas cards, birthday cards, to-do notes or temporary displays.

The white and coloured variants of the STAS magnet set cannot be combined with STAS wooden rails, STAS j-rail (max), STAS evoluon and STAS plaster rail. The 2-in-1 variant can be combined with all STAS rails except for STAS j-rail max, and STAS evoluon.

STAS magnet set

The standard STAS magnet set consists of a steel cable with cobra and ten white tripod magnets.

STAS coloured magnet set

The STAS coloured magnet set consists of a steel cable and ten cone-shaped magnets in five different colours.

STAS magnet set 2-in-1

The STAS magnet set 2-in-1 can be used in two different ways. Hook the cable into your STAS rail with the cobra or hang it with a loop onto an edge panel hook or any other hook. This set comes with five cone-shaped magnets in five different colours.

STAS papergrip

twice as handy

STAS papergrip is one rail with two applications. Thanks to a handy internal strip, papers can be easily clipped into the rail or removed. In addition, cards (etc.) can be placed in the special ledge on top of the rail.

STAS papergrip is suitable for thick and thin paper and it can even grab hold of thin magazines and laminated paper. Separate rail pieces can be connected to create a hanging system spanning the entire wall.

Optional: click specially designed STAS papergrip hooks onto the rail to hang up additional small items, like keys, or for example a STAS magnet set 2-in-1.
A STAS papergrip hook has a weight capacity of 3 kg.

- dimensions 13,3 x 45 mm
- length 50, 100, 150 or 200 cm
- rail: aluminium with powder coating, inside strip: polyurethane foam core and polyethylene coating layer
- white, white textured, black textured, alu textured, alu
- standard with railclips (3 per metre) optional with magnetic tape or double-sided tape
- 5 years warranty

Picture Hanging Systems

STAS grip-up (on papergrip)

extra handy

The STAS grip-up is a product that can be mounted in two ways. You can click the STAS grip-up over the STAS papergrip or mount it directly on the wall. In combination with the STAS papergrip, the pleasantness of a wall shelf is combined with the handy clamping mechanism of the STAS papergrip. Place photo frames, books or other decorations on the shelf section and hang notes, drawings and posters from the bottom. This gives you plenty of room for decoration and important papers.

In addition to being used in combination with the STAS papergrip, this product can also be mounted directly on the wall using the STAS grip-up wall clips.

Tip from STAS: It is also possible to purchase a length of the STAS grip-up that is shorter than the length of your STAS papergrip, so that only a small part can be used as a wall shelf.

- dimensions 45,3 x 60 mm
- length 50, 100, 150, 200 cm

STAS papergrip hanger

secure hanging

The STAS papergrip hanger has been specially developed for hanging a whiteboard (with a max. size of 90x120 cm) on the STAS papergrip (mounted with screws), by means of 2 STAS papergrip hangers. The hangers are attached to the whiteboard with screws and then placed on the STAS papergrip, after which the whiteboard is easy to install and move. In addition, the hanger is equipped with a safety lock, so that it cannot be pushed out of the rail when force is exerted on the whiteboard. By mounting stabilizing caps the whiteboard remains stable. This makes the STAS papergrip hanger very suitable for the safe hanging of a whiteboard in educational institutions.

In addition to the whiteboard, other objects can also be hung on the STAS papergrip hanger. For suspending light items such as a small clock, the hanger can be attached with double-sided tape.

- dimensions 3,5 x 9,5 mm
- steel with powder coating
- white
- to the product to be hung
- weight capacity per hanger per meter 20 kg/m
  papergrip hanger set: whiteboard of max. 90 x 120 cm

STAS name tag

a place for every name

The STAS name tag is a clip that can be clicked on the STAS papergrip. Paper can be placed inside this clip. With the STAS name tag, the names of the children can be displayed in the classroom or in your home.

* Templates for printing out the name cards are available on request. Please contact our sales department for more information.

STAS grip-up (on the wall)

extra handy

In addition to being used in combination with the STAS papergrip, the STAS grip-up can also be mounted on the wall to create a wall shelf. The wall shelf allows for an easy presentation of decoration, frames or books.

The STAS grip-up is mounted directly on the wall using the STAS wall clips.

- dimensions 45,3 x 60 mm
- length 50, 100, 150, 200 cm

STAS poster hanger teak

stylish alternative to the picture frame

This stylish poster hanger made of high-quality teak wood is a popular alternative to the standard picture frame for hanging posters and prints. Compared to the classic picture frame, a wooden poster hanger is a trendy addition to your interior due to its rustic design!

You simply clamp the poster between the wooden slats by means of strong magnets. Thanks to the smart design, your poster remains intact, hangs perfectly straight, and can be changed in no time. The STAS poster hangers are available in different sizes. For the best result, choose a poster hanger that is slightly larger than your poster.

- dimensions profile 14 x 18 mm
- length 21, 30, 42, 50, 60, 70, 84 or 100 cm
- FSC certificated teak wood
- paper thickness 1 mm
- 5 years warranty

STAS suspended ceiling hooks

and double hanger

No more messing around with bending paper clips or tying strings. With the white STAS suspended ceiling hooks, you can hang up children's crafts, festive decorations or lesson material to the suspended ceiling in an instant. All you need to do is slide the hook over the runners of the suspended ceiling.

STAS suspended ceiling hooks are available with an eyelet and with a hook.

The STAS double hanger is a very easy way to hang signing from a drop ceiling in combination with, for example, the STAS drop ceiling hooks.

STAS signtrack

a presentation that sticks

With the STAS signtrack you can easily hang advertising, posters and signage (from 0.2mm to 1mm thick). The STAS signtrack is easy to use, due to the sliding mechanism at the top and bottom. Inserted material remains undamaged and a professional presentation is guaranteed. An indispensable addition for shops, offices, catering, conventions and institutions.

The STAS signtrack can be used with the STAS qubics or with the STAS suspended ceiling hooks (in combination with matching cords) to hang from the ceiling. The STAS sign track can also be used with our many rail systems in combination with the cords with cobra hook for a wall mounting.

- dimensions 12 x 21 mm
- length 42, 60, 80, 100, 120 or 200 cm

STAS poster strips and poster snaps

hanging without framing

STAS poster strip
The STAS poster strip is a classic poster strip in transparent plastic and is designed to lock posters into position so as to hang them neatly, simply and stylishly. The poster can be slid into the strip from the side.

STAS poster snap
The STAS poster snap is a more luxurious variant to the plastic poster strip, made from high-grade aluminium. This makes the system ideally suited for presenting canvases, fabrics and heavy posters without taking anything away from the style.

The poster does not have to be inserted from the side: simply click the STAS poster snap open and shut at the top and the bottom.

STAS poster strip
- dimensions 6 x 13 mm

STAS picture hits

invisible connection

STAS picture hits are transparent plastic clips that allow you to easily connect photos, cards and other lightweight decorative items to each other and to your STAS rail.

The first clip is screwed into your STAS rail. Then you can slide a photo, card or other decoration into the clip. By sliding a new STAS picture hit on the bottom or side, you can attach another decoration. Step by step, you can create your own unique collage.

STAS picture hits are ideal for temporary or changing decorations, for instance photos, Christmas cards, birthday cards, vacation snaps, streamers and other party or seasonal attributes.

Tip: place the transparent distance strips between the rail and your decoration to hang it a little lower, for example at eye level.

- plastic
- transparant
- to be attached to a STAS rail*
- suitable for paper and thin cardboard
- 5 years warranty

STAS panel hooks

the classic hanging solution

Panel hooks offer a practical solution when you need to hang objects from wall panels, partition walls, doors, cornices, etc.

They are very easy to combine with STAS cords with a loop and a STAS zipper or STAS smartspring. This way, you can create a complete hanging system in an instant, but without the aluminium rail.

STAS picture hooks and hangers

STAS no-tilt set & frame stabilizer

Beautiful paintings should hang perfectly! Do you have a STAS picture hanging system and does your hanged painting tilt a bit? Hang your painting perfectly flat with the STAS no-tilt set or the frame stabilizer.

STAS no-tilt set

Due to the different openings, small corrections can be made to the suspension cord so that your painting hangs perfectly flat against the wall.

- dimensions 34 x 19 x 16 mm
- stainless steel
- mounting: with 2 hanging hooks with 2 screws on wooden frame or painting with a recessed back, min. 35 cm wide, max. 60 mm thick and min. 18 mm thick.
- weight capacity 10 kg per set
- minimum weight 1,5 kg

STAS frame stabilizer NEW

By hooking the hanging cord behind the clip your picture will hang straight against the wall.

- dimensions 12 x 38 x 2,5 mm
- nickel plated iron
- mounting with 1 screw on a wooden frame or painting of at least 2 cm thick.

STAS frame stabilizer
AT100010

STAS dibond hanger

The STAS dibond hanger is a self-adhesive aluminum plate with a hook, which can be attached to the back of flat panels. We offer the STAS dibond hanger in various sizes, each with its own carrying capacity. The tape, which is on the back of the STAS dibond hanger, comes from the brand tesa® and is of high quality. With the STAS dibond hanger we supply a special cleaning cloth that should be used to remove grease and dust from the surface.

The STAS dibond hanger is suitable to attach on the back of flat panels such as mirror and art/photos on acrylic, glass, dibond or aluminum*. An attachment to wood or MDF is possible by mounting screws in the existing screw holes of the STAS dibond hanger. This way, the tape attachment of the STAS dibond hanger on flat panels can be reinforced as well.

* Rough, porous or fibrous surfaces (wood/MDF/plasterboard/plaster blocks) and Polypropylene/ Polyethylene (PP/PE) plastics are not suitable for tape-attaching the STAS dibond hanger.

ATTENTION! It is very important that you remove grease and dust from the surface with the supplied cleaning cloth. Let the cleaner dry thoroughly. Then press the STAS dibond hanger firmly for 10 seconds and let it dry for 24 hours before you hang an object.

STAS v-tense & h-tense

combine endlessly

The tensioned cable system can be used flexibly and mounted on walls or ceiling. Horizontally, vertically and diagonally! The possibilities in combination with the STAS qubic, the STAS evoluon and the other STAS rail systems are therefore endless. Consider, for example, applications for the creation of shop windows, the presentation of houses in the real estate sector, displaying menus in restaurants or hanging material in schools or in the office.

STAS v-tense (vertical)

The STAS v-tense is, together with the STAS h-tense, part of the tensioned cable system assortment. The STAS v-tense can be used vertically and is equipped with a glider on both sides. The cables are easy to tighten. In addition, an extra spring has been added to the STAS v-tense so that the wire still offers enough elasticity to hook into a rail with a hook. The STAS v-tense can be combined with various STAS rail systems, the STAS qubic and the STAS evoluon to easily create a wall presentation.

* Also available in a version with a glider on one side and a STAS cobra on the other for hanging options with a STAS rail.

STAS h-tense (horizontal)

The STAS h-tense is, together with the STAS v-tense, part of the tensioned cable system assortment. The STAS h-tense can be used horizontally and is equipped with a glider on both sides. The wire is easy to tighten. The STAS h-tense can be combined with the STAS qubic to easily create a wall presentation.

STAS v-tense & h-tense

accessories & possibilities

STAS accessories

STAS frame clamp (4,5 mm)
TCS30001

STAS frame clamp (4,5 mm)
The STAS frame clamp can be screwed onto a tensioned wire. When 2 tensioned wires are mounted next to each other with both a STAS frame clamp, a frame or other material (minimal 1 mm and maximal 4.5 mm thick) can be clamped between them.

STAS frame connector (4,5 mm)
TCS30002

STAS frame connector (4,5 mm)
The STAS frame connector can be screwed onto a tensioned wire. The double opening allows several frames or other material (minimal 1 mm and maximal 4.5 mm thick) to be placed next to each other.

STAS tense-frame
A4 TCS30010
A3 TCS30016

STAS tense-frame A4 and A3
The A4 size frame comes with 4 STAS frame clamps (4.5 mm). When 2 tensioned wires are mounted next to each other, the STAS tense frame can be placed between these wires. The frame can be opened at the top so that material can be placed inside. Think, for example, of applications for advertisements or the presentation of houses in real estate. The frame can be closed magnetically.

STAS frame clamp (8,5 mm)
TCS30003

STAS frame clamp (8,5 mm)
The STAS frame clamp can be screwed onto a tensioned wire. When 2 tensioned wires are mounted next to each other with both a STAS frame clamp, a frame or other material (minimal 4 mm and maximal 8.5 mm thick) can be clamped between them.

STAS frame connector (8,5 mm)
TCS30004

STAS frame connector (8,5 mm)
The STAS frame connector can be screwed onto a tensioned wire. The double opening allows several frames (minimal 4 mm and maximal 8.5 mm thick) to be placed next to each other.

STAS shelf clamp (8,5 mm)
TCS30005

STAS shelf clamp (8,5 mm)
The STAS shelf clamp can be screwed on the STAS steel cable with glider (p.35). When 4 sets of STAS steel cables with glider are mounted with 4 STAS shelf clamps, a STAS shelf can be placed in between to create shelves.

STAS shelf connector (8,5 mm)
TCS30006

STAS shelf connector (8,5 mm)
The STAS shelf connector can be screwed onto the STAS steel cable with glider (p.35). Thanks to the double opening, several STAS shelves can be placed next to each other in order to create shelves.

STAS shelf 20 x 30 cm
TCS30025

STAS shelf
The STAS shelf is a plexiglass shelf of 20 x 30 cm. With the help of 4 STAS shelf clamps, this shelf can be attached to 4 sets of STAS steel cable with glider (p.35) in order to create shelves. (other dimensions available upon request)

STAS security hook
HA30600

STAS security hook
The STAS security hook is a hook that can be used with the STAS v-tense. The STAS security hook can be placed before as well as after mounting the tensioned wire by means of a rotary wheel behind the hook.

STAS signage clip
TCS30007

STAS signage clip
The STAS signage clip can be screwed onto a STAS steel cable with glider and then placed in the STAS qubic. Signs with a minimum thickness of 2 mm and a maximum of 7 mm can be clamped in the STAS signage clip.

* Can also be used with STAS steel cable with loop and STAS drop ceiling hook.

STAS metal clips
MC10100

STAS metal clips
These metal clips are suitable for hanging various materials on the STAS h-tense. Think of hanging alphabet letter tiles, posters, drawings, decorations, all kinds of papers and light objects.

STAS distance clamp
TCS30009

STAS distance clamp
The STAS distance clamp can be screwed onto a tensioned wire. The front part can be loosened, after which this part can be pushed through the drill holes of a frame, plate or other object. The 2 pieces can be tightened again. Due to the extended back, the STAS distance clamp ensures that the wall object hangs stable and with a same distance from the wall.

STAS tense LED frame
TCS30015

STAS tense LED frame
The A4 size LED frame comes with 4 attached clamps. When 2 tensioned wires are mounted next to each other, the STAS tense LED frame can be placed between the wires. Material can be placed in the frame by removing and replacing a transparent magnetic plate.

STAS tense 12V power (60W)
The STAS tense 12V power is an adapter that can be used to power the STAS tense LED frame with 60W power. A maximum of 12 LED frames* can be connected to this adapter.

* max. 12 LED frames connected on 2 tensioned wires. If you want to use more than 12 LED frames and / or more than 2 tensioned wires, it is necessary to use multiple adapters.

STAS h-tense, STAS qubic, STAS metal clips, alphabet letter tiles

STAS h-tense, STAS qubic, STAS tense frame & STAS frame clamps

wall mounting STAS qubic pro

ceiling mounting STAS qubic pro

STAS qubic

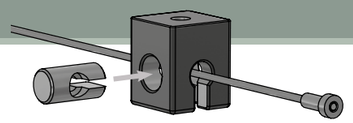
flexible in all directions

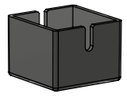
The STAS qubic is a compact and square hanging system, suitable for hard walls such as stone or concrete. Do not underestimate the STAS qubic by its size, because that is exactly what's so convenient about this hanging system.

The STAS qubic is suitable for one hanging point and can be easily installed in the more difficult places. Think of a stairwell, a slanted ceiling or a pillar. The STAS qubic can be mounted in many different ways and therefore the cords can also be hooked in many possible ways.

The versatility of the STAS qubic makes it an indispensable hanging system for difficult places with hard walls.

- dimensions 22 x 22 x 24 mm
- aluminium
- alu textured
- ceiling- and wall mounting
- weight capacity 15 kg/m
- 5 years warranty





Parts

For matching hooks and cords, see page 37. See page 66 for combining with STAS v-tense & h-tense.

wall mounting STAS qubic pro

ceiling mounting STAS qubic pro

STAS qubic pro

flexible in all directions

The STAS qubic pro works the same as the STAS qubic, but is suitable for soft walls such as plaster and sand-lime brick. The mounting plate can be installed with 2 screws which provides extra reinforcement of the STAS qubic pro in the soft wall.

Just like the STAS qubic, the STAS qubic pro can be used in the more difficult places. The versatility of the STAS qubic pro makes it an indispensable hanging system for difficult places with soft walls.

- dimensions 50 x 50 x 24 mm
- aluminium
- alu textured
- ceiling- and wall mounting
- weight capacity 20 kg/m
- 5 years warranty

STAS paperrail

marbles put to good use

STAS paperrail is an aluminium rail used to hang loose papers. The rail contains glass marbles, which press against the paper, creating a handy clamping mechanism.

You can slide drawings, announcements and photos into the rail with a single move and remove them again without any damage to the paper. Papers can also be placed on top of the rail.

Ideal for use in classrooms, offices, restaurants and even at home above the kitchen table. The STAS paperrail is mounted directly onto the wall.

- dimensions 21 x 48,5 mm
- length 50, 100 or 200 cm
- aluminium
- white or alu
- wall mountable, not adjoining to ceiling
- 5 years warranty

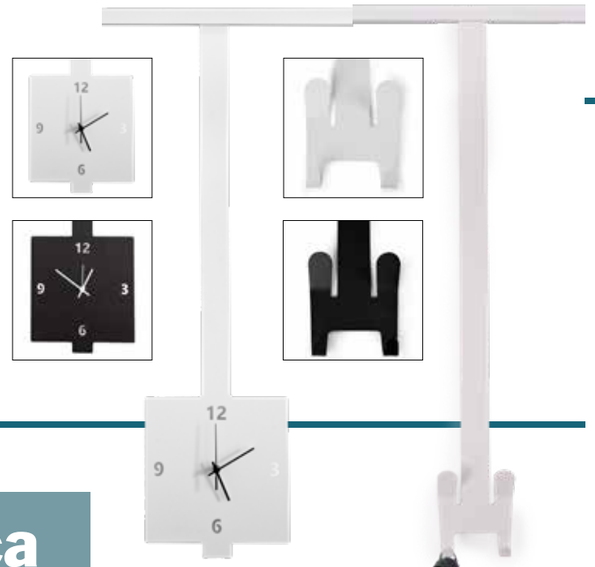
STAS clocktica & STAS tunica



The STAS clocktica is a silent design clock that can be hooked into almost any STAS picture rail system.* The clock works on batteries and is made of sturdy steel. The STAS clocktica is suitable for educational institutions, for in the office or for your own home. Complete your interior with this flexible design clock!

STAS tunica is a stylish coat hook system that easily fits into almost all STAS rails*. Now your wall not only has a decorative purpose, but a practical one as well. The coat hook is sturdy, but also easily and endlessly moveable. The STAS tunica has a neutral design and features two coat hooks.

*With the exception of the STAS wooden rails, STAS j-rail (max), STAS evoluon and STAS plaster rail.

STAS clocktica
- dimensions 25 cm wide
- length 43 or 95 cm
- powdercoated steel
- white textured, black textured
- 5 years warranty

STAS tunica
- dimensions 15 cm wide x 5,2 cm depth mounting strip: 5 cm wide
- length 95 cm
- powdercoated steel with 2 hooks
- white or black
- 10 kg per hook
- 5 years warranty

STAS TV hanger

With the STAS TV hanger, drilling into the wall to hang your TV is a thing of the past! With the STAS TV hanger you don't have to make a final decision about the location of your TV because you'll be able to move the hanger to another place in your rail system* really easily. In addition, your TV will always hang straight. The STAS TV hanger is suitable for TVs from 26" to 55" and for TV's with a VESA size from 75x75, 100x100, 200x200 and 400x400.

The black TV bracket is mounted at a suitable height on the white hangers with the supplied screws and the vertical brackets are mounted on the back of your TV. You can easily hang your TV by clicking it on the mounted TV bracket.

* The STAS TV hanger with cobra end can be used with the STAS minirail, STAS cliprail (max and pro), STAS multirail (max, crown and flat), STAS u-rail (multi), STAS prorail (max, crown and flat), STAS drop ceiling rail and the STAS plasterboard rail. When mounting your TV, always take into account the maximum load of your picture hanging system.

- white textured with black TV bracket
- suitable for TV's from 26" to 55" and for TV's with a VESA size from 75x75, 100x100, 200x200 and 400x400.
- 5 years warranty

STAS eyecatcher

Never lose your glasses again with the STAS eyecatcher!

With this eyeglass holder you will always have your glasses directly at hand. The eyeglass holder is equipped with 4 strong neodymium magnets* that keep the clip in place without clumsy glasses cords or holes in clothing. The STAS eyecatcher is an eyeglass holder that is suitable for reading glasses, sunglasses and computer glasses. A nice gift for yourself, your loved ones or as a promotional gift!

* Note: This product contains strong magnets, so we do not recommend people with a pacemaker or ICD to use this product.

Torx T20 screws
We supply a large part of our products with Torx T20 screws for a better grip. These can be easily mounted with a special screwdriver bit or with the STAS screwdriver bit Torx T20.

Disclaimer STAS dibond hanger
It is the user's responsibility to carry out the mounting of the STAS dibond hanger in strict accordance with the supplied mounting instructions. All technical information and data are provided on the basis of quality tests and our many years of practical experience. These are considered an average value and are not suitable for specification. For this reason, STAS picture hanging systems cannot provide any guarantee, either explicitly or implicitly, with regard to the suitability of the STAS dibond hanger for what the user wants to hang. The user is therefore responsible for determining whether the STAS dibond hanger is suitable for the situation in question. In case of doubt, our employees will be happy to advise you.

STAS products TÜV certified
STAS strives day after day for products of the highest quality. To guarantee the quality and independence of products, STAS has commissioned TÜV Netherlands for the testing of its products. TÜV Netherlands is an independent and recognized body that assesses the quality of products according to a set standard and has extensive experience in the field of product safety and product inspections. Under the direction of TÜV, a large part of our range of products has been tested for quality and correctness of the specified features. All products where the TÜV logo is shown, have actually been tested by TÜV Netherlands and approved for the capacity that is stated in the features of that product.

Important note regarding warranty and liability
Products of STAS must be installed and used only in strict accordance with the latest version of the STAS picture hanging systems installation guide, available for download at www.stasgroup.com. It is the responsibility of the installer to select the correct fasteners for the particular installation. Improper installation, misuse, misapplication or otherwise failing to completely follow seller's instructions and warnings may cause product malfunction, property damage or personal injury.
