STAS offers freedom

STAS is a developer, manufacturer and distributor of high-quality picture hanging systems for a wide range of wall decorations.

Our goal is to offer people freedom as they use and decorate their walls. Sustainable building management and cost savings are key in our approach.

STAS was founded in 1995 by brothers Rien and André Stas. The head office is located in Eindhoven, the Netherlands.

What is a picture hanging system?

STAS picture hanging systems are rail systems:

- a narrow aluminium rail is mounted to a wall or ceiling
- a cord is hooked into the rail
- a hook slides over the cord to the desired height
- an object can be suspended from the hook

Besides rail systems, we also offer additional hanging products, including:

- systems for hanging paper
- magnetic hanging systems
- panel hooks

What can you hang with STAS?

Our picture hanging systems are not only designed for hanging up paintings. You could also use our systems to hang:

- bulletin boards
- whiteboards
- notice boards
- mirrors
- clocks
- drawings
- seasonal decorations
- advertising material
- floor plans and escape routes
- coat racks

The advantages of STAS

Hanging your items with STAS enables you to endlessly move, change and vary your wall decor without hassle, tools or damage to your walls:

- no more drilling
- no expenses for wall repairs or maintenance
- can be used by everyone
- a one-off purchase, lifelong advantage
- can be fixed to any type of wall or ceiling
- sustainable building management
- substantial long-term cost savings

For every room with walls

The project market we serve is extremely broad. This is not surprising: every space with walls can benefit from picture hanging systems.

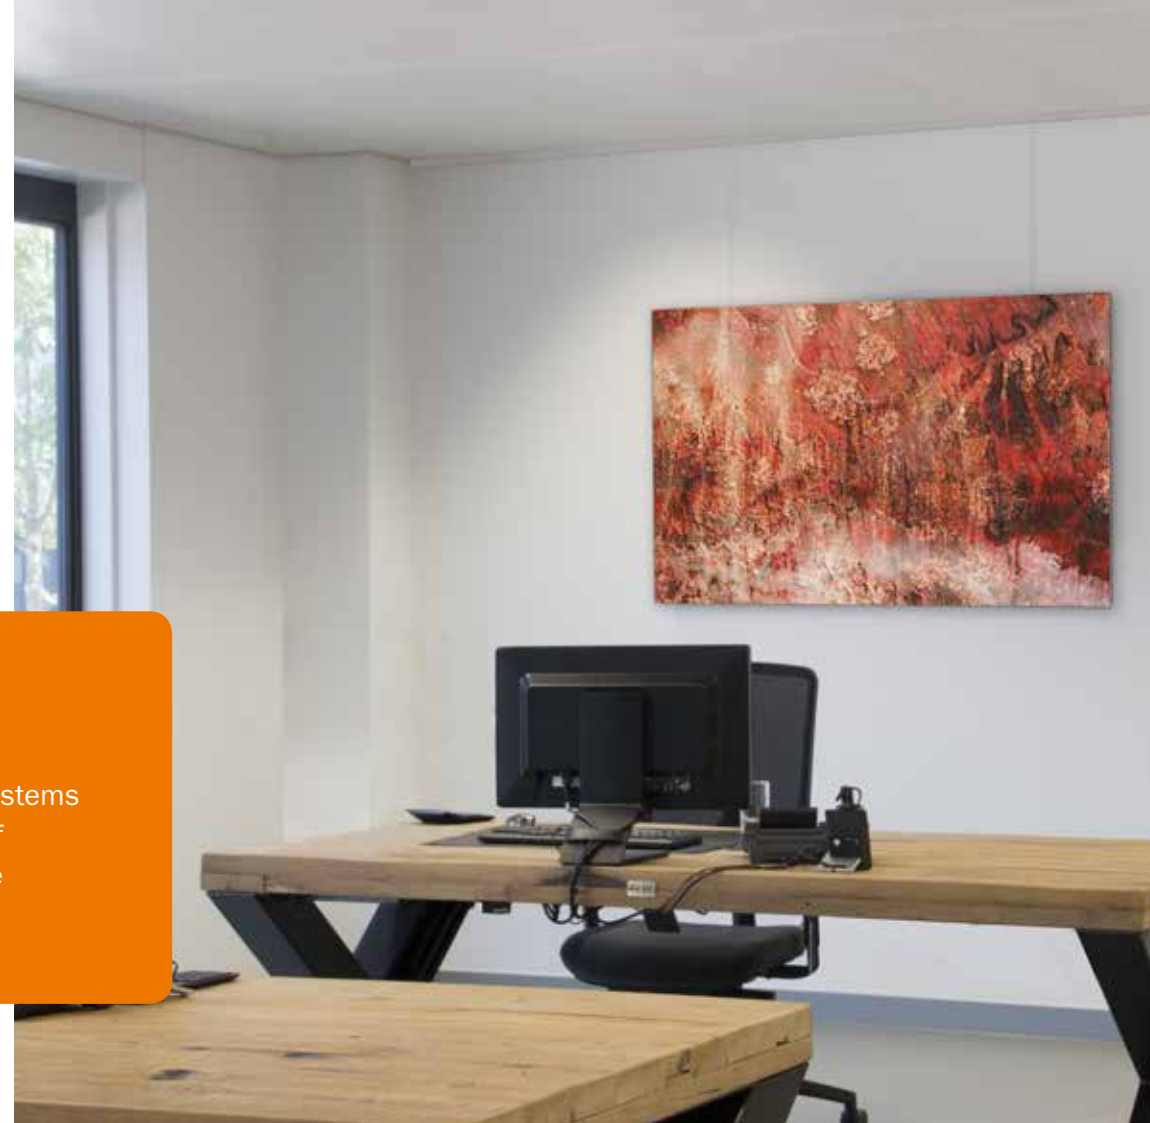

We supply our systems and products to businesses and institutions in education, healthcare, business, government and hospitality.

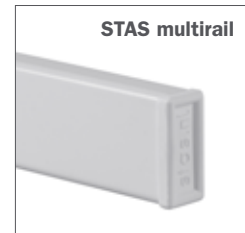

Products of STAS

Picture hanging systems

STAS offers a wide range of hanging systems. The systems differ in terms of look, weight capacity and method of mounting (wall or ceiling mountable) and can even be customised to client-specific needs.

STAS u-rail multi

STAS multirail flat

STAS multirail crown

Picture hanging systems with lighting

Alongside to regular hanging systems, STAS offers an extensive range of hanging systems with integrated lighting. The 12 V power supply wires that run through these rails allow you to place a light fixture anywhere along the rail to provide the perfect LED or halogen lighting for your wall decorations.

Additional products

Not every object can be suspended using one of our rail systems. This is why our range also includes additional hanging products. Perhaps you have metal walls and are looking for magnetic solutions, or perhaps you want to hang up drawings and papers without framing them first. STAS has the answer!

And, finally, you can also find products at STAS that suspend from a rail system, such as coat hooks. In short: STAS can organise wall design from A to Z.

How does STAS go to work?

Internationally, STAS mainly operates via distribution. We always strive to develop long-term partnerships and intensive collaboration.

Among other services, we support our distribution via...

- webshops
- custom made marketing materials
- online advertising
- packing materials
- white label products

Museum De Acht Zaligheden Eersel
